JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 229 (1987)

SUBJECT INDEX

Aluminium bromide,
double-layer studies in a non-polar solvent consisting of ——— and KBr in ethylbenzene (Nacamulli-Piran, Gileadi) 165
Aromatic compounds,
electrosorption valency of organic electrosorbates. Part II. ——— and heterocyclic compounds (Rolle, Schultze) 141

Bromine,
interaction of ——— with Ag (110): comparison of electrochemical and gas-phase adsorption measurements (Bange et al.) 87

Chalcogenide,
electrode surface modification through Nafion-attached transition-metal cluster ——— particles (Alonso Vante, Tributsch) 223
Chromium,
kinetics of the anodic oxidation of isopropanol on ———/titanium-oxide electrodes (Beck, Schultz) 339
Clay modified electrodes,
———. Part VII. The electrochemical behaviour of tetrathiafulvalenium-montmorillonite modified electrodes (Carter, Bard) 191
Cobalt,
electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulphoxide (Webley et al.) 273
Convection,
the onset of buoyancy-induced ——— at a micro-mosaic electrode (Whitney, Tobias) 429
Copper,
competition between the rearrangement of electrodeposited overlayers of ——— on platinum and the hydrogen electrode reactions (Margheritis et al.) 327

Double layer,
——— capacity of jellium with pseudopotentials (Leiva, Schmickler) 39
Influence of a faradaic process on the ——— capacity (Retzlav, Baumgärtel) 181
——— studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene (Nacamulli-Piran, Gileadi) 165
Temperature dependence of the ——— properties of gold faces in perchloric acid solutions. Part I. The (210) gold face (Hamelin et al.) 107

Ethanol,
"in situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ——— on platinum in acid medium (Beden et al.) 353
Ethylbenzene,
double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ——— (Nacamulli-Piran, Gileadi) 165
Exchange current densities,
the meaning of ——— in electrocrystallization (Budevski) 423

Green function–superoperator formalism,
many-body effects in electrochemisorption. Part I ——— (Mishra, Rangarajan) 51
Gold,
structure of H_2SO_4 monolayers on ——— (111) (Zei et al.) 99
Temperature dependence of the double-layer properties of ——— faces in perchloric acid solutions. Part I. The (210) gold face (Hamelin et al.) 107

Halide solutions,
structure and composition of the Ag (111) surface as a function of electrode potential in aqueous ——— (Salaita et al.) 1

Heterocyclic compounds,
electrosorption valency of organic electrosorbates. Part II. Aromatic and ——— (Rolle, Schultze) 141
Hexachloroiridate(III/IV),
——— on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism (Doblhofer, Lange) 239
High-frequency impedance spectroscopy,
——— of fast electrode reactions (Schöne et al.) 407
Hydrogen,
direct proof of the ——— in the methanol adsorbate at platinum — an ECTDMS study (Wilhelm et al.) 377
Hydrogen electrode reactions,
competition between the rearrangement of electrodeposited overlayers of copper on platinum and the ——— (Margheritis et al.) 327

Infrared reflectance spectroscopy,
"in situ" analysis by ——— of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium (Beden et al.) 353
Interface of two immiscible electrolyte solutions,
kinetics of salt extraction into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the ——— (Koryta, Skalický) 265
Isopropanol,
kinetics of the anodic oxidation of ——— on chromium/titanium-oxide electrodes (Beck, Schultz) 339

Jellium,
double layer capacity of ——— with pseudopotentials (Leiva, Schmickler) 39

Many-body effects,
——— in electrochemisorption. Part I. Green function–superoperator formalism (Mishra, Rangarajan) 51
——— in electrochemisorption. Part II. Operator averages and MF–HF limits (Mishra, Rangarajan) 67
Mean field–Hartree–Fock limits,
many-body effects in electrochemisorption. Part II. Operator averages and ——— (Mishra, Rangarajan) 67
Methanol,
direct proof of the hydrogen in the ——— adsorbate at platinum — an ECTDMS study (Wilhelm et al.) 377
Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in ——— oxidation by non-oxygen-adsorbing ad-atoms (Shibata, Motoo) 385
Identification of the adsorbate during ——— oxidation (Iwasita et al.) 367
Preparation of highly despersed Pt + Ru alloy clusters and the activity for the electrooxidation of ——— (Watanabe et al.) 395
Micro-mosaic electrode,
the onset of buoyancy-induced convection at a ——— (Whitney, Tobias) 429

Operator averages,
many-body effects in electrochemisorption. Part II. ——— and MF–HF limits (Mishra, Rangarajan) 67
Oxygen,
determination of the kinetic parameters of the ——— reduction reaction using the rotating ring–disk electrode. Part II. Applications (Anastasijević et al.) 317
Determination of the kinetic parameters of the ——— reduction reaction using the rotating ring–disk electrode. Part I. Theory (Anastasijević et al.) 305
Electrochemical examination of the coordination of ——— and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulphoxide (Webley et al.) 273

Phthalocyanines,
spectroscopic and electrochemical studies of transition-metal tetrasulphonated ———. Part VIII. Spectroelectrochemical studies on stacked-ring silicon phthalocyanines (Simic-Glavaski et al.) 285
Platinum,
competition between the rearrangement of electrodeposited overlayers of copper on ——— and the hydrogen electrode reactions (Margheritis et al.) 327
Direct proof of the hydrogen in the methanol adsorbate at ——— — an ECTDMS study (Wilhelm et al.) 377
"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on

——— in acid medium (Beden et al.) 353
"In-situ X-ray diffraction studies of ——— electrode/solution interfaces (Fleischmann, Mao) 125
Preparation of highly despersed ——— + Ru alloy clusters and the activity for the electro-oxidation of methanol (Watanabe et al.) 395
Polyacrylamine,
electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/——— functional film (Ye et al.) 215
Polyparaphenylene,
electrochemical preparation of a ——— film and a polyparaphenylene/polyacrylamine functional film (Ye et al.) 215
Potassium,
apparent ion-exchange current densities at valinomycin-based ——— ion-selective PVC membranes obtained with an ac-impedance method (Xie, Cammann) 249
Potassium bromide,
double-layer studies in a non-polar solvent consisting of Al_2Br_6 and ——— in ethylbenzene (Nacamulli-Piran, Gileadi) 165
PVC,
apparent ion-exchange current densities at valinomycin-based potassium ion-selective ——— membranes obtained with an ac-impedance method (Xie, Cammann) 249

Quinones,
ESR-spectroscopic investigation of the parallel electron and proton exchange between ——— and their radicals. Part I. Measurements at 298 K (Grampp, Jaenicke) 297

Ruthenium,
preparation of highly despersed Pt + ——— alloy clusters and the activity for the electro-oxidation of methanol (Watanabe et al.) 395

Salt extraction,
kinetics of ——— into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the interface of two immiscible electrolyte solutions (Koryta, Skalický) 265
Silver,
ellipsometric study of the ——— (single crystal)/NaF interface with a view to obtaining the electron distribution profile (Chao et al.) 19
Interaction of Br with ——— (110): comparison of electrochemical and gas-phase adsorption measurements (Bange et al.) 87
Structure and composition of the ——— (111) surface as a function of electrode potential in aqueous halide solutions (Salaita et al.) 1
Sodium fluoride,
ellipsometric study of the Ag (single crystal)/——— interface with a view to obtaining the electron distribution profile (Chao et al.) 19
Sulphuric acid,
structure of ——— monolayers on Au (111) (Zei et al.) 99

Tetrathiafulvalenium-montmorillonite,
clay modified electrodes. Part VII. The electrochemical behaviour of ——— modified electrodes (Carter, Bard) 191
Titanium-oxide,
kinetics of the anodic oxidation of isopropanol on chromium/——— electrodes (Beck, Schulz) 339
Transition metal,
electrode surface modification through Nafion-attached ——— cluster chalcogenide particles (Alonso Vante, Tributsch) 223
Spectroscopic and electrochemical studies of ——— tetrasulphonated phthalocyanines. Part VIII. Spectroelectrochemical studies on stacked-ring silicon phthalocyanines (Simic-Glavaski et al.) 285

Valinomycin,
apparent ion-exchange current densities at ———-based potassium ion-selective PVC membranes obtained with an ac-impedance method (Xie, Cammann) 249

X-ray diffraction,
in-situ ——— studies of Pt electrode/solution interfaces (Fleischmann, Mao) 125
